

## fatan

Find the arc-tangent of a value

### Description

```
Float:fatan( Float:value )
```

Find the arc-tangent of the given value in radians.

### Parameters

value	input value in radians
-------	------------------------

### Return value

Returns the arc-tangent value.

### Example usage

```
new Float:x;  
  
x = atan( 1 );      // 0.785398..
```
