SetDeviceStatus

Set the device status

Description

```
SetDeviceStatus( deviceno, status item, new value )
```

This function returns no value.

Parameters

`deviceno`	Device number to set
`status item`	The status item to set (see GetDeviceStatus)
`new value`	The value to set

See GetDeviceStatus for possible values for the Status item parameter.

Return value

0

Example usage

```
   SetDeviceStatus(1, DVCSTAT_COMMERR, 0);    // reset comm counter to 0 for device #1.
```
