

strcat

Concatenate strings

Description

```
strcat( dest[], const source[], maxlenlength=sizeof dest )
```

Copy the string source to the end of dest.

Parameters

dest	destination string
source	string to be added to dest
maxlength (optional)	max total length of the result

Return value

Returns the number of characters added to the string.

Example usage

```
new s{20} = "Hello ";
strcat(s, "World"); // returns 5
// s is now "Hello World"
```
