

strlen

Find the lengths of a string

Description

```
strlen( const string[] )
```

Counts the number of characters in `string`, not including the terminating null.

Parameters

string	The string that will be checked
--------	---------------------------------

Return value

Returns the number of characters in `string`

Example usage

```
new x;  
new s{40} = "CatDogAnt";  
  
x = strlen(s);  
  
// x is now 9
```
